

RED HAT CONSULTING BRMS SERVICES

JBoss® Enterprise BRMS provides an open source business rules management system for easy business policy and rules development, access, and change management. This enables the enterprise to make active business decisions as business events occur.

Investing in BRMS installs a very powerful, highly efficient system for business rules execution maintenance. It allows businesses to reduce development time to update applications, SOA deployments, and business processes with the latest business rules and policies.

In order to take full advantage of these optimizations, it is crucial to properly understand the tools prior to implementation. Red Hat Consulting BRMS Services provide a bridge for your business and technology teams to fully realize the power of the JBoss Enterprise BRMS system.

RED HAT CONSULTING BRMS SERVICES INCLUDE:

- Architecture of BRMS platform
- Setup Of New BRMS System
- Identification Of Business Owners
- BRMS group and permission setup
- Selection of BRMS rules types (BRL, DRL, decision tables)
- Mentoring on BRMS rules creation
- Mentoring on fact model creation
- Integration between your application and the BRMS system
- Extraction of existing business logic from legacy applications that are not rules-engine-based to BRMS
- Migration of rules sets from existing third-party platforms to BRMS
- Optimization of the existing software development life-cycle for BRMS integration

BENEFITS

- Provides mentoring and guidance to organizations adopting new business rules technologies or migrating systems.
- Serves as a bridge between business and technical users helping both teams fully realize the power of the JBoss BRMS system.
- Identifies ownership within your organization related to business rules maintenance.
- Ensures the teams receive mentor-based training on the creation and maintenance of rules, testing and deployment of rules, and integration of rules to existing systems and services.

BUSINESS PROCESS MANAGEMENT SERVICES

Red Hat Consulting Business Process Management allows organizations to meet the speed and accuracy demanded by their customer bases through an approach for improving efficiencies spanning across design, execution, and monitoring of business processes. Our methodology is designed to help organizations close the gap between strategic vision and operational execution. We leverage industry standards, best practices, and best-in-class technologies to implement a BPM program and framework that cater to the four primary organizational dimensions: people, process, technology and data.

ABOUT RED HAT CONSULTING

Red Hat Consulting delivers a range of middleware professional services from strategic solutions to product-aligned engagements. Our global middleware practice team is composed of enterprise architects with deep experiences integrating JBoss Enterprise Middleware with other open source and proprietary software. This broad technology experience enables Red Hat Consulting to assist our clients with complex integration migration and solutions development efforts.
