**JBoss, Inc. Introduces JBoss World 2005 User Conference**

*Registration Now Open for Inaugural User Conference Showcasing Best Practices,  
Case Studies and Emerging Technologies for Expanding JBoss Community*

**ATLANTA—November 8, 2004**—JBoss®, Inc., the Professional Open Source company, today announced that registration is now open for JBoss World 2005, its first annual users conference and exhibition, at the Omni/CNN Center in Atlanta, Ga., March 1-2, 2005. The conference will be a landmark gathering field and networking opportunity for the rapidly growing number of users and partners deploying open source middleware from JBoss into production.

JBoss World 2005 will feature educational sessions, panel discussions, customer case studies and product demonstrations focused around the capabilities and architecture of the growing federation of open source projects comprising the JBoss Enterprise Middleware System. Exhibits will highlight the most innovative ideas and products from JBoss and the JBoss partner network. JBoss received an enthusiastic community response to its call-for-papers, with over 100 submissions, the best of which will be selected by JBoss developers and users. Sessions—presented by JBoss core developers, customers, partners and community members—will cover best practices for products like Hibernate, JBoss Application Server, JBoss Cache, JBoss jBPM and Tomcat.

“JBoss is extremely proud to present JBoss World 2005, dedicated to the thousands of users who develop and, in many cases, have taken the lead in rolling out applications on JBoss open source software,” said Marc Fleury, chairman and CEO of JBoss, Inc. “This inaugural conference will be a proving ground for JBoss Professional Open Source—from technology to services—and an unique opportunity for the JBoss user community to come face-to-face with the JBoss core development team.”

Mr. Fleury will deliver an opening keynote address. Additional highlights will include keynotes from Martin Fink, vice president of Linux at Hewlett-Packard and other well-known influencers in the Open Source community; a JBoss management roundtable focused on the direction of JBoss technology and its relationships; and a JBoss customer panel illustrating the experiences of recognizable customers who have adopted Professional Open Source as a safe choice for their enterprise.

### **Registration Information**

JBoss World 2005 attendance is limited to 500 to optimize interaction among all parties. In keeping with the JBoss open source tradition, JBoss World 2005 will be priced much lower than other industry events. There is an early bird discount price of \$450, which covers all sessions, keynotes, conference-sponsored meals and other events. To register, please visit <http://www.jboss.com/company/events/jbossworld2005>.

### **About JBoss, Inc.**

Through its Professional Open Source model, JBoss, Inc. is making open source a safe choice for the enterprise. JBoss provides resources, technology direction and core development for popular open source projects and stands behind them with enterprise-grade support and services. JBoss is building a complete Enterprise Middleware System based on the Professional Open Source model that now includes Tomcat, Hibernate, JBoss jBPM, JBoss Cache, the JBoss Microkernel and the JBoss Application Server, the industry's fastest growing J2EE application server in use, with over five million downloads. Corporate Express, La Quinta and Nielsen Media Research, among others, rely on JBoss open source middleware for mission-critical enterprise applications. Partners who embed or bundle JBoss products and resell JBoss services include Computer Associates, HP, Novell and Unisys. JBoss has headquarters in Atlanta, Ga. and Neuchâtel, Switzerland. For additional information, please visit [www.jboss.com](http://www.jboss.com).
